

AT A GLANCE

CRANE POWER 26V – 28V NiMH 30AH / 900 Wh BATTERY

Non hazardous, “Safe to Fly” suitable for flying without restrictions

Ultra high capacity 28V or 30V NiMH battery

1 x 26 - 28V or 30V outputs (specify voltage required)

Advanced digital features with tough rugged design and construction

Internal 2 x 50Amp SB fuses

LED discharge indication: LED Battery level meter

Typical life expectancy of 4 – 5 years in regular use

DESCRIPTION

The **Crane Power** Battery is an ultra high capacity 26v - 28V or 30V 30Ah NiMH battery. One of our most powerful batteries, designed to power Heavy duty Cranes.

Crane Power is able to safely supply peaks of 120 Amps or 90 amps continuously.

Crane Power is compact and versatile and can be used for many applications.

Additionally available for **Crane Power** batteries we can offer a heavy duty

Commoning Block enabling longer run time from 2 x **Crane Power** batteries

together or to facilitate “hot swap” change over of fresh batteries or up to 6 x Crane

Power Batteries used together to power the **Cine Power 3KvA Inverter System** in

its custom housing. Also the new accessory, **Spyder Box**, which provides 2 x 8 P

Neutrikon inputs to 4 outputs of 3 P XLR type or other connectors of choice, all

mounted on a custom **Cheese plate**, for ease of mounting.

The battery is fitted with a special over-discharge protection device. Yellow and red

LED's will give prior warning that the cut-off point is close.

Designed to power applications where there is a demand for greater power and extended run-times. **Crane Power** is a powerful, robust, rugged battery which will give typically 4 – 6 years of full battery capacity service before requiring replacement cell blocks, (available as spares).

Crane Power can be auto fast charged with the Cine Power **Mega Charger**.

SPECIFICATION

• Output Voltage	30Ah
• Chemistry	NiMH – non hazardous
• Internal Fuse	2 x 50Amp Slow Blow
• Output Power	>100 Amps
• Output Connectors	8 pole Neutrik Speakon / Custom
• Indications	LED battery discharge indicators LED meter – current consumption
• Size	L 25cm x H 20cm x W20cm
• Weight	18Kg
• Charger	Cine Power Mega Charger

FEATURES

- Fully sealed high energy NiMH battery cells
- Non-hazardous, suitable for air transport without restrictions
- High capacity battery designed for sustained heavy discharge
- Unique automatic over-discharge protection to prolong battery life
- Tough, rugged design & construction to withstand tough environment use
- Designed to be charged by a Cine Power –*Mega Charger*
- No need to discharge the battery before charging
- Proven and reliable
